DETAILED ACTION

Drawings

The drawings filed on 4/1/2004 are acceptable subject to correction of the informalities:

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the sealing member comprising a pair of O-rings (emphasis added, because Figure 2 only illustrates one sealing gasket and not a pair) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Figures 3-5 should illustrate proper crosshatch.

In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

Claims 2-11, 13-16, 18 and 18 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose a restraining member with at least one break-off member which breaks from the intermediate ring after the sealing gasket is compressed into sealing engagement with the pipe.

The Examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would be motivated to make a proposed combination of primary and secondary references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
